**PICK & GO UNIT**  
*(Patent Pending)*

**Material Handling Solutions**

We would like to introduce you to the Topcraft Tool, Inc. "PICK & GO Material Handling Machine". The PICK & GO unit is a state of the art, computer controlled, and user friendly picking unit. Utilizing an 8" diameter magnet for picking any size steel plate or steel part out of a standard Dunnage bin (36" wide x 48" long x 36" high or any size).The PICK & GO places the part on a conveyor, which then delivers them to a comfortable height, putting the part at the operator's fingertips. The operator can then place the part on a fixture or automated pallet.

The parts automatically stop at the end of the conveyor, much like grocery store items stop for the cashier at the supermarket. The unit is also capable of placing numerous parts, depending on part size on the conveyor.

No longer will your employees have to bend over tubs of parts, straining their backs or cutting their fingers. The PICK & GO unit does it for you.

The PICK & GO unit is extremely mobile. It is mounted on 5" diameter heavy-duty, ball bearing casters with a floor brake.

*The PICK & GO unit does the work no one else wants to do. PICK & GO is fully capable of running 24 hours-a-day, 365 days-a-year. All you need is a 110 volt plug and an airline.*

**PICK & GO UNIT  
ADVANTAGES OVER  
HUMAN LABOR:**

1. 24-HOUR WORK DAY
2. 365 DAYS-A-YEAR
3. NO MEDICAL INSURANCE
4. VERSITILITY
5. INCREASES PRODUCTIVITY
6. MOBILITY
7. 90 DAY WARRANTY
8. 1 YEAR LIMITED WARRANTY

**FEATURES:**

- TOUCH SCREEN COMPUTER
- 9-12 ZONE PICKING PATTERN
- LOW BIN LIGHT
- EMPTY BIN LIGHT
- 12 SECOND CYCLE
- AUTO START, STOP CONVEYOR
- 110 VOLT
